

Strategy for 2006 - 2010

The Strategy focuses on eight dimensions:

- 1- Self Regulation
- 2- Education and Training.
- 3- Practice and Workplace Conditions.
- 4- Challenges of Human Resources
- 5- Leadership and Decision Making
- 6- Professionalism.
- 7- Research and Development
- 8- Coalition and Collaboration

National Nursing Strategy main objectives are:

- Protect citizens through regulation of the profession that assures competent nursing services.
- Promote the level of nursing education and continuous education programs.
- Achieving competent and ethical nursing care.
- Create a balance between the national demand for nursing services and the national supply of manpower, in lieu of immigration related to nursing job opportunities.
- Developing leaderships in nursing that could effectively carry out the strategy directions.
- Strengthen the compliance with ethical behavior, and professional duties dictated by professional ethics, to promote society's trust.
- Nurturing the scientific research, and research culture among nurses in the various health institutions.
- Enhancing coalition and partnership between the various health sectors.
